RECIPE
OF THE YEAR

Ready, Set, Grow!

You hold in your hands the power to create a joyful, memorable experience for your customers. As you browse this recipe guide to decide what you'll grow for next season, consider what they'll need from you to be successful. Gardeners will be happily seeking baskets of their favorite Supertunia Vista® Bubblegum® petunias, pots of ColorBlaze® coleus to liven up their shaded patios, and Luscious® lantana to draw in the hummingbirds next spring. It's up to you to grow the bountiful blooms that will bring smiles to their faces and butterflies to their porches.

We've designed this guide to make it easy for growers like you to select and produce premium quality container recipes. Starting with design and production tips from our own growers, we'll walk you through everything you'll need to know to create gorgeous hanging baskets and upright containers.

You'll browse through nearly 200 of our most successful recipes categorized by color and container styles. Mix and match your favorites to build a comprehensive program for the upcoming season, keeping in mind seasonal preferences for color and cold/heat tolerance.

It's time to up your container recipe game. Let's get started.

How to Design and Grow Premium Recipes that Sell

Container recipes are popular with home gardeners because they offer instant beauty and color in a convenient take-home package. So how do growers create the combinations customers love, and produce them as efficiently as possible? Here are seven tips from Brian Bourdon, Four Star Greenhouse's offsite and product line manager, who has created hundreds of our most popular recipes.

1 Pair Plants with Similar Vigor

One of the biggest mistakes people make when designing container recipes is not matching plants with comparable vigor ratings. When a high vigor plant like Supertunia Vista® Bubblegum® is paired with plants that are less aggressive, it quickly overtakes the other plants and sets the combination off balance. But when it is grown with other high vigor plants, the recipe grows perfectly together.

We've tested and rated all of our annual plants for vigor using a scale of 1 to 4. Pay close attention to these ratings when designing your own recipes. If you are following one of our named recipes, we've already factored vigor into account.

Since all three Supertunia Vista® petunias share a vigor 4 rating, they are equally compatible in this Above and Beyond recipe.

2 Match Cultural Needs

Growers are savvy at pairing plants with similar needs together in production to increase efficiency. The same rule applies when matching up plants in container recipes. Factors to consider include: lighting and shade requirements, moisture, nutrients, growing temperature and heat tolerance. Most annuals will perform well at a pH of 5.8-6.2, so this detail is less critical to examine.

This Blown Away recipe works well because both Blue My Mind® Evolvulus and Luscious® Royale Pina Colada Lantana share similar high light, low water and warm temperature requirements.

3 Stretch the Imagination

Once your top-selling recipes are established, let's think beyond the standard 3-variety thriller-filler-spiller formula and create premium complex container recipes with higher price points. These can be sold in much larger, high quality decorative containers as cash and carry items. Watch how quickly they fly out the door when it's time for people to decorate for graduation parties and other special occasions.

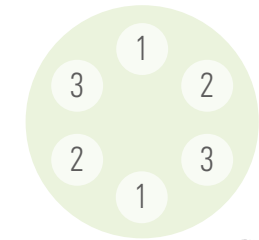

Container recipes are trending larger and more complex as people look to create fewer plantings with higher impact for their decks and porches. Choose an unconventional thriller like Toucan® cannas to create a lush look, then surround it with larger fillers and spillers to create a stunning mosaic of color and texture.

In addition to your standard top-selling recipes, grow a few complex recipes at higher price points for premium container sales. Here, we paired Toucan® cannas with hummingbird magnet Vermillionaire® Cuphea and Lady Godiva™ Orange Calendula in our recipe named The Wild Bunch.

4 Follow the Diagram

We provide planting diagrams for all our hanging basket and upright container recipes found in this guide and online. It's important to train your production department to follow these diagrams when transplanting liners into new hanging baskets and upright containers. This will ensure enough liners are used and that they are positioned to achieve the most attractive mix of colors and textures.

Following the planting diagram will ensure the container grows full and balanced.

This Looking Sharp recipe follows the classic thriller-filler-spiller formula.

5 Easy Design Formulas

If you're looking for an easy way to combine plants in premium quality hanging baskets and upright containers, the thriller-filler-spiller method continues to be a success. Consumers have come to know and love this formula, too.

There are countless varieties that will work in these types of recipes – the hardest part is narrowing down your choices. Instead of a typical spike or grass, try something different this year and use a Toucan® canna, Meteor Shower® verbena or Pegasus® begonia as your thriller for a more premium finished product.

6 Color Schematics

We all know that color sells. While pink and purple rank consistently as consumers' favorite colors, bicolors also rank near the top of that list. Color preferences tend to shift through the seasons too. While pastel pink is often sought after for spring recipes, bold magenta pink plays prominently in warm season combinations.

To accommodate the color preferences of a broad array of consumers, we've created container recipes in 15 different color schemes. From pastel to patriotic, vibrant mixes to earth tones and more, you'll find over 950 container recipe ideas at www.provenwinners.com.

Our Belle Ambition recipe combines consumers' favorite colors for spring including bicolor Supertunia® Lovie Dovie™ petunias and Superbena® Stormburst verbena.

7 Classic v. Unconventional Pairings

Your design and production staff surely has a list of favorite container recipes they grow beautifully every year. Don't be afraid to substitute in a new color or variety from time to time. We're constantly working to improve even our most popular varieties and significant advancements have come in foundational plants like Superbells Yellow and Supertunia Royal Magenta.

Alongside the standard recipes you produce every year, try a few unconventional pairings, too. Many younger gardeners relish growing unusual plants and will quickly snap up a recipe featuring our funky new Truffula™ Pink Gomphrena or Rockin'® Fuchsia Salvia, for example. Mixing edible plants like Berried Treasure™ Red strawberries and Amazel™ Basil with ornamentals in large containers is also trending as consumers downsize their gardens.

Mixing plants you can eat with ornamental flowers in large containers is especially popular with younger gardeners who have limited space.

6 Critical Production Tips

Want to produce lush, flower-covered container recipes like those you see in this guide? Lead growers Aleksi Yosifov and Noah Derohanian of Pleasant View Gardens share their top tips.

1 The Key to Success

Starting with exceptional quality liners is the most important thing you can do to get your container recipes off to a great start. Even if you encounter issues along the way as you produce your crop, they will be far easier to navigate if you start with quality liners. Your propagator will be happy to work with you to determine the best liner size and delivery date to fit your production model.

Starting with robust liners is the key to success in growing premium quality container recipes. Work with your propagator to determine the best liner size to fit your needs.

2 Start Your Liners Off Right

Minimizing stress on newly planted liners will avoid complications down the road. As a standard practice, we apply a preventative broad spectrum fungicide drench one week after transplant to all newly transplanted liners. This protects their roots from potential attacks.

3 Moderate Your Watering

It is very easy to overwater newly transplanted liners, so take care not to create this unnecessary stress. During the first few weeks after transplant, the root system is still small and does not yet extend down the bottom of the container. At this time, frequent but low volume water applications are required to provide the liners just the right amount of water they need without becoming overly wet.

Drip lines allow maximum control over irrigation, ensuring liners are not over- or under-watered in production.

4 Build a Strong Foundation

When your liners are young and are newly transplanted into hanging baskets, focus on developing a strong root system for the plants. Timing is key. We closely monitor the growing temperature, pH and EC of the growing media, and fertility while the plants are becoming established in the container.

5 Trimming and Shaping

As the plants are growing, a series of pinches and/or PGR applications are used to shape the plants in the containers. For many plants, we trim around the edges of the containers as needed, prior to spacing uprights and hanging the baskets. PGR rates are listed on our website for all of the plants we offer.

Trimming plants around the edges of the containers before spacing will make it easier to lay them out properly on the floor.

6 Feed Those Plants!

Premium quality hanging baskets and upright containers will fly out of inventory, so be sure you are feeding those hungry plants so they reach their full potential. We've developed four primary and four specialty professional fertilizer products that will help minimize and correct pH-related issues in your production greenhouses. We'll help you select the right product for your situation based on your water test results. All of our fertilizers contain minors and 100% EDDHA as the source of iron.

The eight professional fertilizers we offer can be used with every irrigation. The formula you will use is based on your specific water conditions or needs.

Popular National Recipe Program Expands for 2019

We've diversified our National Recipe Program to meet the needs of all our North American customers this year. Choose those that are best suited to your region and promote them in any season you wish. Based on our careful trialing of these recipes, you can be confident they will deliver the signature Proven Winners all-season performance.

Meet the 2019 Annual of the Year™

ANNUAL
OF THE YEAR

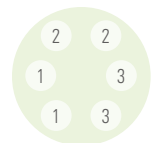

LEMON CORAL™
Sedum

Beauty, versatility and ease of production are three of the 2019 Annual of the Year's most exemplary traits. You'll be amazed how easy it is to pair Lemon Coral sedum with your other top sellers in upright container recipes. Its glowing chartreuse, uniquely textured foliage magically coordinates well with all of its planting partners. Create your own recipe using this and other medium vigor varieties or follow the tested recipes you see here for easy success.
